

POWR-FLITE®

Commercial Sweeper

30" Battery Sweeper

Powr-Flite's Piranha sweepers offer battery-powered innovation that eats up dust and debris in a cleaning frenzy!

PIRANHA

The PS600 Piranha offers convenient battery powered sweeping! With a filtration grade of 99.5% and a large debris container, the PS600 provides efficient, dust-free sweeping for any size area, both indoors and out. The Piranha will clean up dirt, cigarette butts, paper cups, even soda cans...all of the debris typically found in auditoriums, stadiums, and other jobs requiring sweeping. And at only 69dB, the PS600 Piranha offers quiet operation so sweeping can take place without disturbing normal workflow.

The PS600 Piranha is battery operated so there are no cords to obstruct customer accessibility and no heavy gasoline or propane odors. The vacuum system captures everything in its path, including fine dust that a broom

will send swirling into the air. The large recovery tank is made of durable heavy gauge polyethylene and is warranted against breakage and corrosion for 10 years. The recovery tank rolls away easily for debris disposal.

The PS600 Piranha is very simple to operate. It maneuvers easily around obstacles, taking the corners around seating without the operator struggling to get the equipment in position. The variable speed drive makes it easy to go from an indoor area to outdoors with no reduction in efficiency. Parking lots and loading areas are easily sweep clean with the PS600 Piranha. You can even go up slopes of up to 18 degrees with little effort. Operator fatigue will be a thing of the past when you switch to a PS600 Piranha sweeper!

Sweeping system

- The Chevron main brush is adjustable, and ensures good sweeping results regardless of the nature of the dirt or surface being swept.
- The side brush has a buffer rim for protection against damage.

Filter and suction system

- Efficient dust filtration is ensured by a large pleated filter. The effective filter cleaning mechanism (patented) keeps the filter clean for continuous operation even when cleaning surfaces are heavily covered with fine dust.
- Powerful vacuum system to capture dust.
- The vacuum bypass makes it possible to sweep wet floors without affecting the filter.

Debris hopper

- Disposal of debris is extremely easy with the corrosion proof polyethelene container.

Traction drive

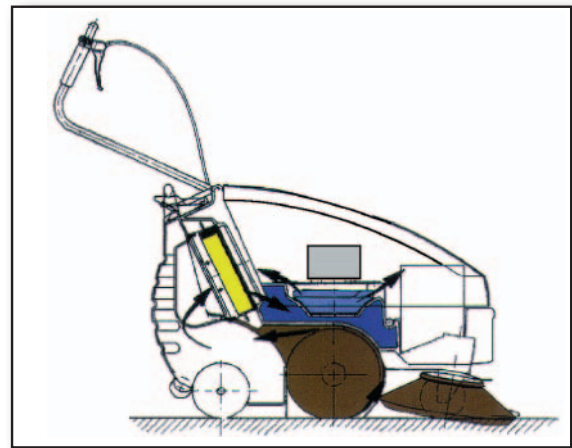

- The variable-speed drive allows sweeping on a variety of floor surfaces.
- Increases speed and productivity

Operation

- Easy to use.
- Extremely maneuverable through the differential axle.
- Economic, dust-free and quiet.
- 7 hours of run time per battery charge.
