

Commercial Wet/Dry Vacuums

Heavy 20 gauge steel tank wet/dry vacs are durable and tough!

Rated for extended water or other liquid pickup – these wet/dry vacs are great for constant industrial vacuuming! For longer lasting motors, these wet/dry vacs feature a 2.5 peak hp motor with a high volume blower port that allows clean dry air to cool the motor and moist or dirty air to bypass it.

- ***Heavy duty 20 gauge stainless steel tank***
- ***8 inch non-marking wheels on reinforced all steel dolly provide easier movement up and down stairs***
- ***External power plug for accessories such as Powr-Flite's Powr-Nozzle***
- ***Swivel locking hose coupling***
- ***Large float cage with shut off float***
- ***Hose storage caddy on PF25 and PF27 only***
- ***All metal tools and wand***
- ***Comes complete with 2 inch one-piece curved chrome steel wand, 1.5 inch x 10 foot crush proof hose, and 3 tools: floor tool, rug tool, and squeegee***

These Wet/Dry Vacuums are Made for Constant Industrial Pick Up. Go from Wet to Dry in Seconds!

All Models feature double sealed motor bearings with extra shielding to keep moisture & dirt out of the bearings... the main cause of motor failure!

Heavy Duty 20 Gauge Steel Construction is rated for extended water or other liquid pickup. Made for Constant Industrial Vacuuming!

Lower motor bearings are contained in steel instead of aluminum housings, so housing will expand at the same rate as the bearing under heat load. This feature prevents replacement of complete housing and dramatically increases bearing life in motor.

Self Sealing, Bayonet Style Vacuum Intake locks for positive compression seal and has full 360 degree swivel metal hose coupling. Operator may safely pull the vacuum by the hose without fear of disconnect or hose entanglement.

8" Non-scuff, Soft Ride Rear Wheels on reinforced all steel dolly feature solid connecting axle. Oversize Wheels Provide easier movement Up and Down Stairs!

Wet/dry vacuums feature external power plug for accessories such as PowrFlite's 17" Powr-Nozzle.

Use blower hole for blowing debris in hard to reach areas into your vacuum's path.

Please Note! Wire Hose Carriage is Standard in 20 Gallon Models & Optional in 10 Gallon Models. For 10 Gallon, Order C20M

Powr-Flite

ALL VACUUMS ARE SHIPPED COMPLETE WITH POWR-FLITE'S DELUXE, HEAVY DUTY METAL FLOOR TOOL KITS! Wands are two-piece, 1-1/2" curved chrome steel. Tools consist of a 14" squeegee tool, 14" bare floor tool and a 14" commercial carpet/rug tool. 10 foot RCP crushproof hose & metal hose couplings with lock-tight swivel connectors.
