## Ultra-Lightweight Portable Battery Mister

Item# PP200-Q02-U

- Lightweight portable design provides fatigue-free use
- Cord-free operation for the ultimate in flexibility and productivity
- Removable 10.8V Lithium-Ion battery provides approximately 6 hours of continuous operation on a single charge
- Adjustable padded shoulder strap
- Built-in carry handle
- 2' - 10' coiled stretch hose
- Ultra-light spray nozzle design
- 4" stainless steel nozzle extension helps to extend the spray reach to over 3'
- Half gallon tank capacity
- Translucent sight-view windows allow for a quick check of solution level

<b>PRESSURE (MAX.)</b>	130 PSI / 9 BAR
<b>Weight (Empty)</b>	Approximately 3.5 lbs/1.6 kg
<b>Dimensions (LxWxH)</b>	8"x4"x12" / 203 mm x 102 mm x 305 mm
<b>Voltage</b>	10.8 VDC
<b>Flow</b>	1.75 GPH / 6.6 LPH
<b>Battery Run Time</b>	Approximately 6 hrs*
<b>Tank Capacity</b>	1/2 Gallon / 2 Liters
<b>Hose Length</b>	2' - 10' / 0.6 - 3 m Stretch
<b>Battery Recharge</b>	90 Minutes
<b>Battery Storage</b>	32° - 140° F / 0° - 60° C
<b>In Tank Filter</b>	Yes
<b>Skid-Free/Anti-Mark Feet</b>	Yes
<b>Spray-Tip Droplet Size</b>	52 Microns**
<b>Spray Reach</b>	≥3 Ft / ≥1 m

\*Variance dependent on user application method.

\*\*Based off water only. Micron size may vary depending on chemical used.

## DISINFECT ANYWHERE

This lightweight portable mister is perfect for spraying all the touchpoints in your facility, without the weight and waste associated with many other larger misters. The shoulder strap and lightweight spray nozzle design minimizes hand and arm fatigue compared to other brands that incorporate the entire machine into a handheld unit, making the Powr-Flite Comet easy to carry even when full of solution. Without the hassle of a cord, this battery powered model allows for the ultimate in flexibility and productivity. The removable 10.8V Lithium-Ion battery provides approximately six hours of continuous operation on a single charge, and the stand-alone AC battery charger recharges in just 90 minutes for quick turnaround on the job. Its ultra-low noise level allows for operation anytime and anywhere without disruption. The Comet is compatible with all water-based disinfectants on the EPA "N List". With tool-free assembly and three simple steps, you will be ready to begin misting in no time.

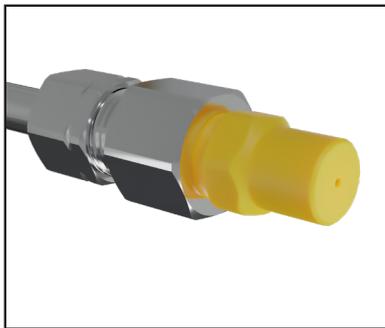

### Built-in carry handle

Allows for the ultimate user flexibility in how the mister is used. Can be used with the included shoulder strap or carried by the handle.

### 4" stainless steel nozzle extension

Helps extend the spray reach to over 3", allowing access to hard to reach areas without having to bend or stoop

### Removable plastic spray tip

Allows for easy replacement, if needed. Spray tip produces a 52-micron droplet size\*, providing excellent coverage and dwell time.

### 2' -10' coiled stretch hose

Provides extended reach and easily adjusts to all sizes of operators, no adjustments required.

### Adjustable padded shoulder strap

Adjusts from 5' to 7' in length to adapt to any size of user. A wide 2" strap reduces the typical strain found with smaller width straps. An included shoulder pad enhances the comfort even over extended periods of use. The strap is easily removed, if necessary.

### Removable 10.8V Lithium-Ion battery

Provides approximately 6 hours of continuous operation on a single charge\*\* and recharges in just 90 minutes with the stand-alone AC battery charger.

\*Based off water only. Micron size may vary depending on chemical used.

\*\*Variance dependent on user application method.
