- Low operating noise levels provide safe operating conditions with fewer disruptions to the working environment
- Handle easily adjusts to fit different operator heights
- 12v battery start for easy start-up
- 28" deck size accommodates every application
- Includes all steel safety fill tank for operator safety

**Powerful Kawasaki engine provides years of service**

**Handle adjusts for operator comfort**

**Tilt design for easy pad changes**

Powr-Flite® high performance propane burnishers provide first class results year after year. At the heart of each unit is the powerful 17 hp Kawasaki® engine which has been the choice of professionals for years. These powerful motors produce 1850 RPM and are mounted on rugged cast aluminum decks. Pads are mounted to flexible pad drivers which conform to the unique undulations in every floor, preventing burn spots. Adjustable and ergonomically designed handle reduces operator fatigue.
