# Powr-Flite has the Right

## ***POWR-EXTRACTOR***

### **Upright Extractors**

Clean everything from delicate drapes and upholstery to deep, embedded dirt with the powerful Powr-Flite upright extractors. With the power and performance for superior cleaning results, the PFX1350 line has the perfect portable for any carpet cleaner or in-house cleaning crew whether you are looking for an economical unit for starting in the business or a seasoned professional looking for maximum cleaning performance. Heavy-duty construction combined with the highest quality components makes the Powr-Flite upright extractor perfect for busy, on-the-go professionals.

### **Heated Upright Extractors**

Add heat to your cleaning arsenal with Powr-Flite's hot water extractors! Hot water adds cleaning power by dissolving many types of soils and actually reduces the levels of biological contamination in the carpeting. A hotter cleaning solution temperature sanitizes carpet and allows the carpet to dry faster.

### **Car Wash Upright Extractor**

Cleaning the upholstery and carpet in vehicles presents a unique challenge – oily dirt and grease. Our single cord, heated extractor is perfect for the busy detail shop, car dealerships and car washes. The powerful three stage vac motor and 1200 watt heater cleans the dirt without blowing circuit breakers. Ideal for mobile or fixed location detailing, the PFX1300-100H provides high quality interior detailing in less time with excellent results – your customers will return time and time again.

### **High-Flow Upright Extractors**

The Powr-Flite high-flow, high CFM extractors feature outstanding suction power to remove more dirt and more solution. The dual 2-stage vac motors are in air parallel for an increased CFM of 201. Higher CFM means improved cleaning ability, recovery rate and dry times. Production is increased and the carpets are dry faster allowing the area to be open to traffic much sooner.

# Extractor for Any Job.

Large 12" stair climbing wheels and dual pig-tail on heated models.

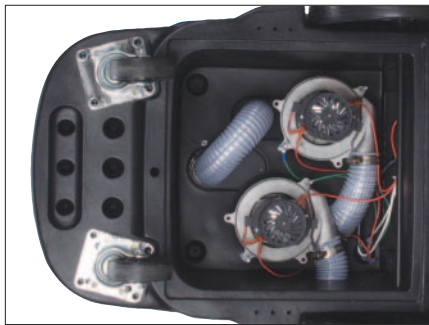

Independent motors, pump and heater switches.

Large solution and recovery tank openings for easy tank cleanup and filling.

Front mounted pressure gauge on 200 - 400 p.s.i. models and recessed brass connector.

Removable access panel allows easy access to vacuum motors.

Tools fit right on the unit for easy portability.

Clam shell design allows easy access to pump and heater.

Wheeled handle for ease of loading and unloading, even with only one person.

## Upright Extractors - Standard

- Get even the dirtiest carpet clean with the deep cleaning power of 100, 200, or 400 p.s.i.
- Dual 2-stage vac motors provide excellent solution recovery, allowing carpets to dry faster
- Large "stair climbing" wheels and front mounted carrying handle get you up and down stairs with ease
- 5 years housing and frame, 1 year vacuum motor, pump and workmanship warranty

## Heated Upright Extractors

- Powerful high performance 1750 watt heater for added cleaning ability
- Built in 20' insider hose, combining the vacuum and solution line in one convenient hose
- No blown breakers with separate circuit and heat indicator lights
- Independent motors, pump, and heater switches

## Car Wash Upright Extractors

- Includes upholstery and detail tool for efficient upholstery and carpet cleaning
- 1200 watt heater for the heat necessary to remove the oily dirt tracked into vehicles
- Powerful 100 p.s.i. pump/waterlift
- No more getting solution lines tied up around seats or shifters... our Insider Hose features the vacuum hose and solution line in one

## High-Flow Upright Extractors

- Forceful p.s.i. (choose from 100 or adjustable up to 400 p.s.i.) flushes dirt from the dirtiest carpets
- High-flow 201 CFM increases recovery significantly over standard systems accelerating dry times for faster in-service times
- Heated models offer a powerful 2000 watt inline heater for the toughest dirt

Model	Solution Tank	Recovery Tank	CFM	Vac Motor	Waterlift	In-Line Heat	p.s.i.	Weight
